From the bottom properties window, select your **Designs View** tab.

In the PS Designs folder, open **Continuous Line**. Scroll down until you see cornflower.hqv.
- Double click on the design to load it onto a new design page.
- Click on the design to select it.

> **NOTE – For a design to repeat on path, it must be a continuous line design.**

**Convert Design to Artwork**

- Select the **Preview** tab.

- From the ribbon, click on the **Artwork** button.
Resize the design

- In the upper properties window, select the **Transform** tab.

- In the width box, change the number to 1 and click **Apply**.
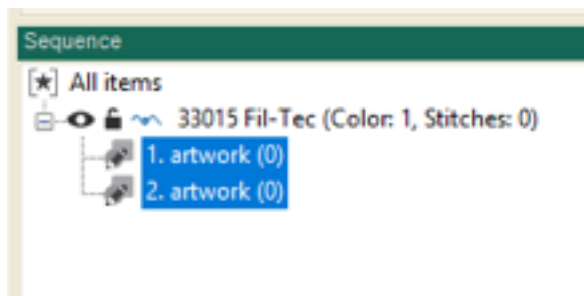

Draw the Path

- Select the **Tools** Tab.

- From the Draw Tools, select the **Curve** Tool.

- Draw a curving path for your design. Right click to complete your design.

- Select both your design and the path by selecting them in the **Sequence View** properties window.

- Select the top design first, then hold down the shift key while clicking on the next design.

A black box will surround both designs.

- From the ribbon, select the **Repeat** on Path button.

A Repeat On Path dialog box will appear

- Click on **OK** and your design will repeat on the path you created.

- To remove the path, select it in the **Sequence view** window, right click and select **Delete**.
Assign Stitches

- Select the **Preview Tab**.

Preview

- Click on the **Stitches** button.

Stitches

- Click on the **Stitchout** button.

Stitchout

- From the Preview bar, click on the **Pla/y** button to watch the stitching simulation.
