If you have Baste mode selected, there is now a warning screen to alert you before you start stitching.

• To see this in action, first select the Baste button from the Pro-Stitcher tab ribbon (or it may be in your Quick Access tools).

• Load a design to your work-space, then select the Pro-Stitcher tab.

• From the ribbon, select the Quilt button.

The Baste Mode warning will now pop up, reminding you to turn off the baste stitch before you start stitching out your design.
