

- Open PS Designer.
- Click **Help** Tab > **Registration**.

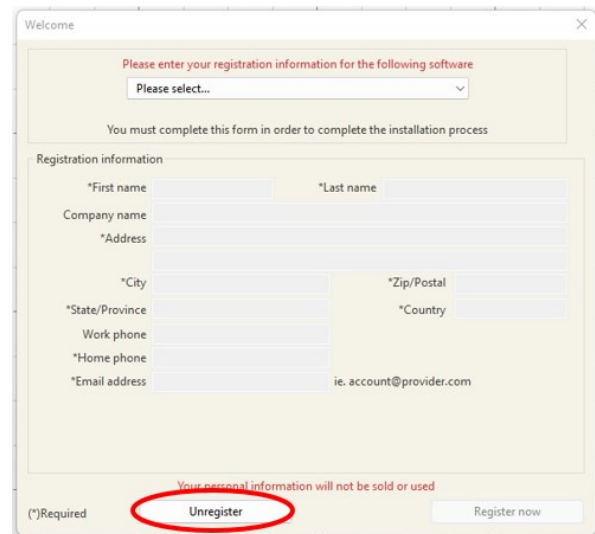

At the top of the pop up window it says, "Please select...".

- Click on **Please select....** and from the drop down menu, select the program that you have registered.
- Take a photo or screen shot of the registration information that auto populates.
- If you have Catalog and Designer, take a picture for each one.

- After you have recorded your registration information, click back on **Please select....**
- Click on **Unregister**.

Your license is now unregistered from your computer and can be used on a different device.
