

Pro-Stitcher®

How to Crop a Design

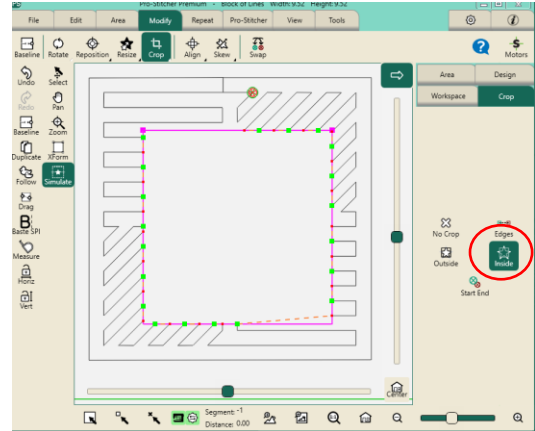

1. Open a design
 - a. **File Tab>Design>Open**
 - b. 1-PS Designs/Blocks/Block of Lines
2. Create an Area
 - a. Move your machine to the top left corner of where you want to create your area.
 - b. Select **Area tab>2 corner** from the ribbon.
 - i. Move your machine down to the right, and select **2 Corner** again.
3. Select the **Modify tab>Crop**.

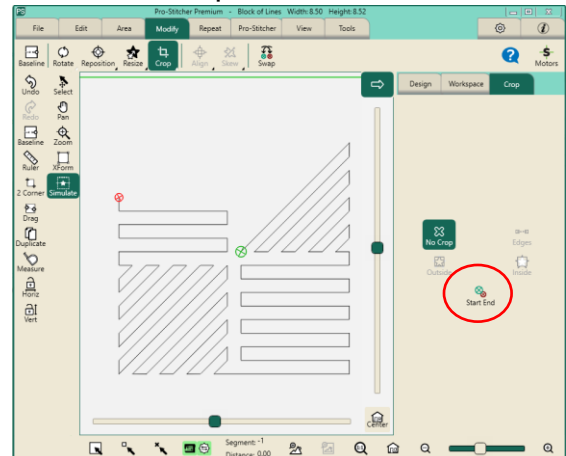

4. In the sidebar, you have two options for cropping: **Inside & Outside**. Try both.
5. **Outside Crop:**

6. **Inside Crop:**

- a. You can close your edges or leave them open, depending on how you want the edge of your cropped design to be finished.
7. Select **Pro-Stitcher tab>New Start & End**.
 - a. In the sidebar, adjust the start and end points with the arrows in the sidebar.
8. **Start End Crop:**

9. After cropping your design, **baseline**, then stitch out your design.
