HOW TO TRANSFER A DESIGN FROM PRO-STITCHER DESIGNER TO PRO-STITCHER (AND BACK AGAIN!)
NOTE – These instructions work on both your Pro-Stitcher tablet, laptop or computer that has both Pro-Stitcher Designer and Pro-Stitcher simulator loaded and running on version XXXXX or later.

- With a design loaded to your design page, select the **Home** tab.

- From the ribbon, select the **Send** button.

- Your design will automatically load in your workspace.

To send a design from Pro-Stitcher to Pro-Stitcher Designer:

- With your design selected in your workspace, select the **Tools** tab.

- From the ribbon, tap the **Designer** button.

- Your design will automatically load on a new design page.

- Make any modifications to the design, and then repeat steps 1 and 2 above to send your design back to Pro-Stitcher.

NOTE – If you do not change the position of your design while modifying it in Designer, it will load back in exactly the same position when you send it back to Pro-Stitcher.
