

Using the Auto Digitizing Feature

The Auto Digitizing feature makes creating a design a snap!

- Select the **Tools** tab.

- From the Ribbon, click on the **Auto Digitizing** button.

- The Auto Digitizer Wizard window will open.

- Click on the **Browse** button to choose a design. Choose the AutoDigi_Dinosaur and click **Open**, then click **Next**.

- On the next screen, set your image size, transform your image by flipping, mirroring or rotating it and then click next.

- In the next screen, you can reduce the number of colors to simplify the image. This reduces the number of jumps that will be in the design.

- a) Reduce the number of colors to two.
- b) There is also the option to edit the image further.
- c) Once the desired changes are made, click **Finish** at the bottom right of the screen.

- The auto digitized design will load to your design page.

- Select the **Preview** tab.

- Click on the **Stitches** button.

- Select the **Home** tab.

- Click on the **Save** button on the Ribbon.

- Give your design a name, choose the format to save it in, then click **Save**.
