## *How to Open and Save a Workspace*

To open a workspace:

- Select File tab.

- From the ribbon, press the Workspace button.

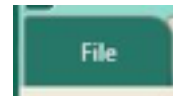

- From the drop-down menu, select Open. This will open the Workspace library.

- Select your saved workspace, then press Open in the bottom right corner of the Open a File Window.
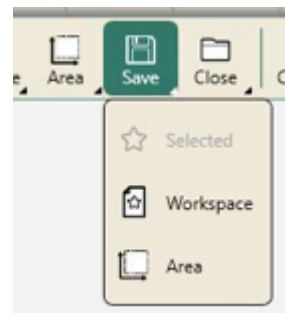

To save a Workspace:

- Select File tab.

- From the ribbon, press Save.

- From the drop down menu, press Workspace.

- Tap in the text box in the bottom middle of your screen.

- A keyboard will pop up. You can rename your workspace, then press Save.
