

If you have Baste mode selected, there is now a warning screen to alert you before you start stitching.

- To see this in action, first select the **Baste** button from the Pro-Stitcher tab ribbon (or it may be in your Quick Access tools).

- Load a design to your workspace, then select the **Pro-Stitcher** tab.

- From the ribbon, select the **Quilt** button.

The Baste Mode warning will now pop up, reminding you to turn off the baste stitch before you start stitching out your design.
