Opening a Design: Choose Your Positioning

When opening a design, you have two options to decide where the design will open in the workspace.

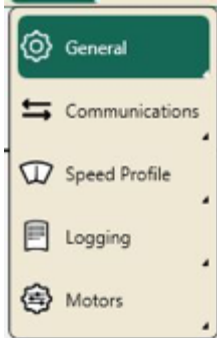

- Select the **Settings** Tab.

- From the ribbon, select the **Advanced** button.

- From the drop down menu, select **General**.

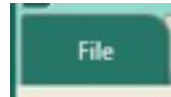

- In the Sidebar, choose from **Load at Start Point at Crosshairs** or **Load Point to Point**.

- Select your preference. The selected button will turn green.

- When loading Point to Point, first load a design.

- Select the **File** Tab.

- From the ribbon, tap on **Design** button to open the design library.

- Click on **Open** from the drop down menu. This will open your design library.

- In the Open a File Window, select 2-PS Tutorials\Cement Truck

- It will open and load to your workspace.

- To connect the next design, select design again from the ribbon, and open the design library again.

- From the library select 2-PS Tutorials\Dump truck cont line

- It will load to the end point of the first design.
