

- Select the **View** tab.

- Select the **Grid** button (it will turn green).

- Select the **Tools** tab.

- Choose the **Arc** tool.

- Following the diagram below, create 5 points to create the curved line.

- After placing the last point, right click to finish the design.
- After finishing the serpentine line, select the **Select** tool (click the design to select it).

- Add stitches by Selecting the **Preview** tab.

- Click the **Stitches** button.

- Click on the **Stitchout** button.

- Then click on the arrow keys to see how your design will Stitchout.

- Save your design.
- Select the **Home** tab.

- Click on **Save**.

- A window will open.
- Choose what folder you want to save in.
- Choose what File name to assign your design.
- The "Save As" type is default set to Inspiration Series (C2S). This is the artwork format.

**NOTE** – It is always a good idea to save in this file type first.

Save again in the file type for your quilting system.

- On your computer's file manager, you can copy the file you just saved to an external USB, take it to your tablet, and stitch it out in Pro-Stitcher or other quilting software.
